

FOR SUPREME QUALITY PRECAST FLOOR MANUFACTURING

EDGE Floor lines include eight high-precision Bed E9-1200b beds which have long lasting steel surfaces and an integrated heating system to speed up curing. Bed heating promotes better bonding between concrete and prestressing strands. This is useful even in warmer climates. Bed P9-1200b length is 150m.

BENEFITS AT A GLANCE:

Manufacture even heaviest products

Durability with rigid construction and high quality surface plate

Fast curing with integrated heating pipes and insulation
