

FaMe Simple Magnets

SMART EVOLUTION

SUPERIOR SHUTTERING

FaMe Simple 10 and Simple 13, the two newer members to the FaMe product family, are ideal in extremely harsh conditions. Compatible with all existing FaMe products and the FaMe Lite and FaMe Flex systems, the Simple series magnets are also the right choice for small and special fastening needs.

Due to their compact size, Simple 10 and 13 can be used with several different customer applications. They are easily attached to all side shuttering systems and materials used by customers. Thanks to the patented jaw connection, they can be extended for use with other FaMe components.

Compact and strong, the attractively priced Simple 10 and Simple 13 magnets take the FaMe system to higher levels of flexibility.

FaMe Hot

Precast factories around the world can be very different when it comes to production traditions and climate conditions. The temperatures in factories or in their curing chambers vary significantly and that can be a challenge for furnishing and shuttering the molds.

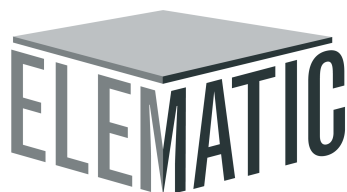

With this in mind, we came up with a version of FaMe (Elematic Fastening Method) that can withstand high temperatures without losing its grip strength. FaMe Hot is developed especially for production methods where curing is speeded up by using high temperatures in curing chambers. Also, in precast factories located in the world's hottest places, the temperature can also occasionally rise, so the new FaMe Hot system is an alternative to traditional FaMe in these cases.

With FaMe Hot, effective precast production and high-quality precast products can be ensured, even when the temperature is 70–80 degrees Celcius. FaMe Hot is as practical, fast, and safe as the rest of the FaMe product family – no matter how hot it is!

Elematic supplies precast concrete machinery and complete production plants for building construction worldwide. Elematic is the leading one-stop-supplier for precast concrete technology.

Our customers are in the business of floors, walls, frames, and foundations – some specialize in one area and some are active in all of them. Precast solutions for all needs – from small scale production plants to huge operations with the same high standards for structural and architectural design. We offer support throughout the entire life cycle, assisting our customers to achieve maximum profitability regardless of the investment level.

That's our offer.
