

EFFICIENT BED PREPARATION BY ONE OPERATOR - REAL TIME SAVER

Preparer P7-1200p is used for cleaning, oiling and pulling strands over the bed. It cleans the casting bed after a completed hollow-core slab has been removed, and in this way ensures the quality of the next slab as there is nothing left on the bed that could make the surface uneven. After cleaning, the Preparer P7-1200p spreads out oil with a wiper and puts strands in place in preparation for the next casting.

Includes

- Brush for bed
- Strand pulling components
- Tip-over waste container
- Bed scraper
- Brush for gutter between beds
- Cockpit
- Bed oiling equipment
- Oil wiper

FACTS

Facts about Preparer P7-1200p

Free travelling speed	1 m/s
Brushing/strand pulling speed	0.5 m/s
Oil spreading speed	1 m/s
Volume of the form oil tank	30 l
Clearance under dispatcher	430 mm
Brush dia.	500 mm
Height	2285 mm
Width	1685 mm
Lenght	3800 mm
Weight	3300 kg
LPG engine	20 kW
Fuel LPG acc.	To ASI spec. HD5

BENEFITS AT A GLANCE:

Cast beds faster by preparing them fast

Reduce labor cost by mechanizing labor intensive work phases

Four wheel drive reduces the number of passes needed

Dust collector makes cleaning easier
